

Assignment A3 · Build a 2-Page Website

Module SC102 · covers Lessons 1–2 · Social Coding SA

What to do

Build a small site about a topic you care about (your community, a sport, music — your choice):

1. index.html — a heading, at least two paragraphs, one image, and a bullet list.
2. about.html — who made the site and why, with a link BACK to index.html (and index links to it).
3. Style both pages with CSS (in a <style> block or one shared .css file): background colour, a styled heading, and one class you reuse.
4. Every tag opened must be closed; check your pages render correctly.

Marks (100)

Component	Marks
index.html content complete	30
about.html + working links both ways	25
CSS applied as specified	30
Valid, tidy HTML	15

How to submit

Zip your files (site.zip) and upload in the LMS before the due date.

Dates: see the assignment in the LMS. Test both pages in a browser before submitting.
